PHENOL NAILS POST-OPERATIVE INSTRUCTIONS

1. You have just had a surgical procedure performed.
2. There may be some bleeding through the bandage. This is normal.
3. Beginning the day after the surgery and repeating daily — remove bandages and soak the area in cool water with the medicine twice daily or as directed and apply antibiotic cream and Band-Aid.

IMPORTANT:

1 Tablespoon (medicine) Epsom Salt or Phisphex per quart of water.
Use cool water only. **NO HOT WATER.**

4. Expect to see a cosmetically unpleasant toe. This is normal.
5. Avoid any shoe pressure.
6. Call me as instructed.
7. See me in the office — as directed.
8. Use ice bag — if necessary.
9. Take Aspirin, Tylenol, Ibuprofen or Aleve for discomfort — if necessary.
10. Elevate the surgical area — if necessary.
11. If you have any questions at all — call the office at (248) 548-7363.
