

April 22, 2019

I would like to thank Dr. Harvey Lefkowitz and staff for a job well done. I visited his office complaining about pain at the sole of my feet, bunions and about toes rubbing together that caused friction in my shoes. The pain in my feet was affecting my everyday work of life; where I did not want to stand nor put my feet inside shoes to walk. I had surgery on both feet. My feet have healed beautifully, where I am now walking free of pain. I highly recommend patients to visit the Michigan Foot and Ankle Clinic.

Thank You again, sincerely Mrs. Roberts.
